

DynamiX Feature Matrix

Our mission in this project was to create an application, whereas the developers @ Dyanmix find the specific features they have installed on past projects therefore being more accessible to implement on current and future projects.

I. User log in

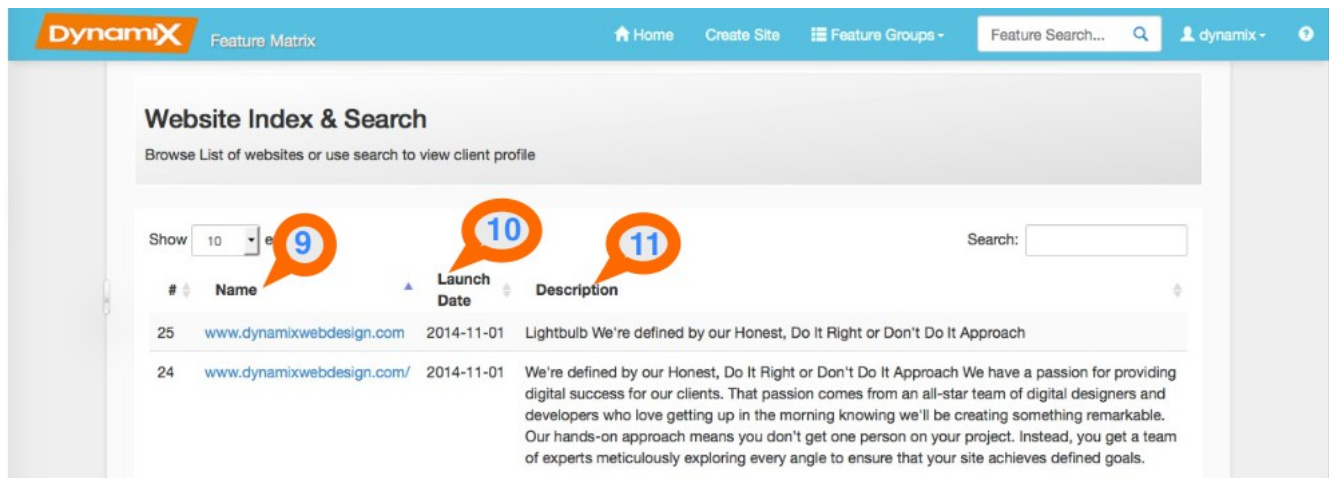

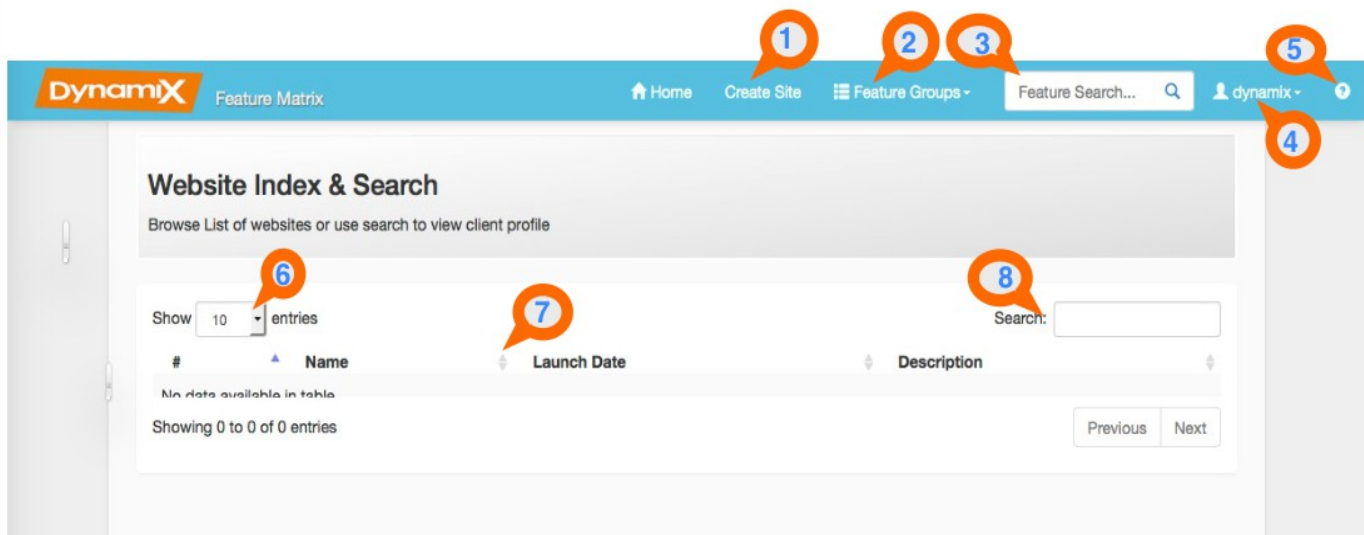

The main administrator will have the initial first log in. Once Admin is logged in, he/she can add users to the system.

- Uses email address for ease of password reset
- Uses email for login

User is logged into DynamiX Feature Matrix Website and Feature Search or redirected to eliminate login errors. To reset password simply click the reset password link at the bottom

left corner.
